PROFESSIONAL SUMMARY

Senior Full-Stack MERN developer with **11+ years of hands-on experience** building scalable, high-performance web applications. Expertise in React.js, Node.js, MongoDB, and cloud infrastructure with a proven track record of delivering complex full-stack systems for SaaS platforms serving 150,000+ users. Skilled in optimizing performance, building responsive UIs, integrating third-party APIs, and architecting modular, maintainable codebases. Passionate about clean code, modern web development practices, and mentoring junior developers.

CORE TECHNICAL SKILLS

Frontend Stack

React.js, Next.js, JavaScript/TypeScript, Redux/Redux Toolkit, Tailwind CSS, Material-UI, Responsive Design, React Hooks, SPA Architecture, Performance Optimization

Backend Stack

Node.js, Express.js, REST APIs, GraphQL, WebSockets/Socket.io, Authentication (JWT, OAuth), Request Validation, Error Handling, API Design Patterns

Databases & Caching

MongoDB, MySQL, Redis, Firestore, Database Optimization, Query Optimization, Indexing Strategies, Connection Pooling

Databases & Caching

Microservices, Modular Monoliths, Event-Driven Architecture, Domain-Driven Design, Distributed Systems, Horizontal Scaling, Load Balancing, API Gateway Patterns

Full-Stack Capabilities

Full-stack system architecture, End-to-end feature development, Client-server communication, Real-time applications, Multi-tenant architecture

DevOps & Cloud

AWS (EC2, S3, CloudFront, SES), Docker, Nginx/Apache, GitHub Actions CI/CD, PM2, Deployment Automation, Environment Management

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | Mazelon Technologies Pvt. Ltd

June 2018 - Present | 7+ Years

Lead full-stack engineer responsible for building and maintaining production-grade MERN applications, system optimization, and providing technical guidance to the development team.

Key Achievements

- Architected and deployed a healthcare SaaS platform serving 150,000+ active users with multi-tenant support for 100+ clinics/hospitals
- Improved frontend performance by 40% through lazy loading, code splitting, and React optimization techniques
- Reduced backend API response times by 35% using Redis caching strategies and MongoDB query optimization
- Built real-time features using Socket.io enabling live notifications, chat, and instant data synchronization
- Integrated 8+ third-party APIs (SendGrid, Twilio, Razorpay, Zoom) into unified system
- Implemented comprehensive error handling, logging, and monitoring system for production stability
- Mentored 4+ junior full-stack developers, conducted code reviews, and established coding standards
- Deployed applications on AWS with zero-downtime deployments and automated CI/CD pipelines

Major MERN Projects

1. Mazoapps Health - AI-Powered Healthcare SaaS

Tech Stack: React.js, Node.js/Express, MongoDB, Redis, Socket.io, AWS, TypeScript

- Built responsive React-based frontend for patient portal, doctor dashboard, and admin panels
- Developed 40+ RESTful APIs for appointment management, health records, prescriptions, communications
- Implemented real-time patient notifications using Socket.io (SMS, email, in-app, WhatsApp)
- Created dynamic charts and analytics dashboards for clinical metrics and patient engagement
- Integrated OpenAI API for AI-assisted doctor documentation (reduced documentation time by 40%)
- Implemented RBAC (Role-Based Access Control) with JWT authentication for 5+ user roles
- Set up MongoDB indexing and query optimization (improved query performance by 35%)
- Configured AWS infrastructure with load balancing and auto-scaling for high traffic.

2. Sevily - Family Health Monitoring Platform

Tech Stack: React Native, Next.js, Node.js, MongoDB, Redis, AWS

Frontend

- Built React Native app for iOS/Android with real-time health data visualization
- Created reusable component library for consistency across mobile and web
- Implemented background services syncing HealthKit & HealthConnect data

Backend

- Designed health data ingestion pipeline with secure encryption
- Built timezone-aware reminder scheduler handling multi-region user base
- Implemented real-time notifications and secure health data syncing

3. Bocxy - Salon & Spa SaaS Platform

Tech Stack: React, Angular, Node.js, MySQL, Redis

- Developed merchant dashboard for service management, staff allocation, pricing
- Built customer-facing booking interface with availability checking and real-time slot management
- Implemented dynamic pricing engine and automated reminder system
- Created analytics dashboard showing booking trends and merchant performance
- Integrated Razorpay for secure payment processing

Development Team Lead | Mic and Mac Solutions Pvt. Ltd

January 2017 - May 2018 | 1.5 Years

Delivered full-stack solutions across multiple domains using MERN and modern web technologies.

Key Contributions

- Led full-stack development of 4 production applications
- Optimized SQL queries improving performance by 30%
- Implemented real-time tracking system using Socket.io and Redis pub/sub
- Provided technical mentorship to junior developers on MERN best practices

Senior Software Developer | Asterfone Technologies Pvt. Ltd

April 2014 - December 2016 | 2.5 Years

Built communication platforms and backend systems using PHP, Node.js, Angular, and MySQL.

CERTIFICATIONS

Node.js (Intermediate) Skills Certification | HackerRank | *October 2025*

- Validated expertise in Event-Driven Architecture, Concurrency, RESTful API Design, and Express.js

MongoDB Developer's Toolkit | GeeksForGeeks | *January 2025*

- Specialized in CRUD operations, Indexing Strategies, Data Modeling, and Aggregation pipelines

AWS Solutions Architect - Fundamentals | AWS | *October 2025*

- Covered AWS Well-Architected Framework, VPC Architecture, and Resilient Cloud Solutions

AWS Cloud Computing Essentials | AWS | *October 2025*

- Validated skills in Solution Design, Security Best Practices, and Cost Optimization

Problem Solving (Basic) Skills Certification | HackerRank | *October 2025*

- Demonstrated proficiency in Data Structures, Algorithms, and efficient problem solving

EDUCATION

B.Tech – Computer Science & Engineering | Veltech University

Diploma – Computer Engineering | Government Polytechnic College

ADDITIONAL HIGHLIGHTS

- Built WhatsApp Business API integration for automated messaging and live chat
 - Developed scalable queue architecture using Bull + Redis handling millions of jobs monthly
 - Modernized legacy monoliths into modular, service-oriented architectures
 - Integrating modern LLMs, Web3, payment systems, reminders, and real-time communication
 - Experience building mobile apps (React Native + Ionic)
 - Set up automated CI/CD pipelines reducing deployment time by 70%
 - Strong debugging skills: Chrome DevTools, React DevTools, Network profiling
 - Experience with micro-frontends, dynamic imports, and performance monitoring
 - Excellent API contract design and documentation practices
 - Experience with load testing tools (k6)
-
